In 1902, the McGraw Publishing Co. for the first time founded its own magazine, a monthly called *Electrochemical Industry*. This was renamed *Electrochemical and Metallurgical Industry* in 1905 and, a year later, it absorbed the magazine *Iron & Steel*. In 1910, the name was changed to *Metallurgical and Chemical Engineering*, and in 1918 this name was changed again to *Chemical and Metallurgical Engineering*. In 1946, the current name—*Chemical Engineering*—was adopted, and in 1958 the publication began appearing every two weeks. Thus the magazine has a continuous history lasting more than eighty years. In 1917, the McGraw-Hill Publishing Co. was formed, incorporating the magazine operations of the McGraw Publishing Co. and the Hill Publishing Co. Ours was the first magazine to be formed by either company.
